Low milk supply	Fusses / slips off the breast
<u>Please enter any additional details (if needed) below:</u>	Continuous or frequent feeds
	Unsettled following feed
	Slow to feed
	Excessively windy
	Dribbles out large amounts of milk

Notes to referrers:

1. The tongue tie clinic is primarily for infants who are breast feeding and having problems with breast feeding that are related to them having a tongue tie. However, we acknowledge that a small number of babies who are bottle fed will have problems due to a tongue tie and we are delighted to assess these babies too. Please do not use this form to refer a baby/mother who does not have any feeding problem.
2. Please complete this form electronically. For the quickest referral method, please make the referral via email: save a copy of this completed form (you may need to use 'save as'), attach to an email and send to uhs.tt@nhs.net. If not sending from an nhs.net email address please obtain parental permission to send via email since non nhs.net email addresses are not considered secure and personal details are being transmitted. To refer by fax (slower) please print completed form and fax for attn: Mrs Pippa Hicks, Mr Hall's secretary on 023 8120 4750.
3. To refer by email please tick this box below to confirm you have parental consent
