

DIABETIC EYE SCREENING

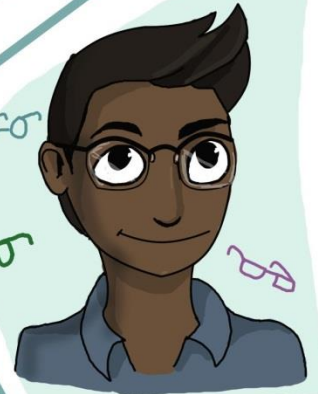

Designed by Madeleine Kenrick for Southampton Diabetic Eye Screening Service
With thanks to Solent Creatives

1 Your screening appointment:

You will receive a letter asking you to book a screening appointment

2

Attend the appointment you booked - bring your glasses if you use them for distance vision (not reading glasses)

3

You will begin with a sight test

4

The screener will put drops into your eyes to dilate your pupils. This could take 20 minutes

5

Photographs will be taken of the backs of your eyes

6

You must not drive for 3-6 hours after your appointment

7

We will assess the photographs back at the hospital

8

Your results will be sent via letter to you and your GP
