

Referral information

UHS is pleased to offer a stereotactic radiotherapy service for early primary lung cancers.

Eligibility criteria

1. Primary lung cancer $\leq 5\text{cm}$ (T1-2a N0)
2. WHO performance status 0-2
3. Patient not suitable for *or* who decline surgery
4. Lesion outside “no-fly zone” [2cm from the bifurcation of the second order bronchus]
5. Local Lung MDT agreement that lesion represents a primary lung cancer and is suitable for SABR:
 - a. Confirmed NSCLC on histology AND/OR
 - b. Positive PET scan AND/OR
 - c. Growth on serial CT scans
6. Absence of significant interstitial lung disease

Instructions for referral

Please send the referral proforma plus results of any relevant tests e.g. lung function and any relevant recent clinic letters from a secure nhs.net email account to the following group email account:

uhs.sabr@nhs.net

Any referrals with incomplete information will be returned.

Please ensure any recent scans are available for the team at UHS to view.

If you are referring from another Hospital Trust **please complete an Inter-provider Transfer Form** and email it to the above address. Referrals will not be accepted without this. Your local lung MDT coordinator can help you with this process if you are unfamiliar with it.

All appropriate referrals will be discussed at the Thursday SABR Lung Meeting+/- UHS Lung MDT and you will be contacted within 48 hours with a response.

Please note if we do not have capacity to treat a patient, we will ask you to refer to an alternative centre.

Any queries please contact via the email account.
