Version Information

Version	Date	Notes	Author(s)
0.1	12/01/2016	First issue	Keith Burrill, Tim Williams
0.2	14/01/2016	Updated with Inform screens following visit to RSH 14 th Jan 2016	Toby Lamb, Keith Burrill, Tim Williams
1.0	15/01/2016	First publication, web page created and integrated into ICE and user manual	Keith Burrill
1.1	31/07/2017	Updated images of slide label positioning as previous position was too low on tube	Keith Burrill, Rick Allan (Lab)

This manual is available to download via the following link:

[http://www.uhs.nhs.uk/HealthProfessionals/Extranet/Services/SUHTPathologyServices/ElectronicRequesting\(Solent\).aspx](http://www.uhs.nhs.uk/HealthProfessionals/Extranet/Services/SUHTPathologyServices/ElectronicRequesting(Solent).aspx)

Electronic Requesting (Solent)

The Southampton pathology ICE system and Solent Inform sexual health system are linked for the purposes of requesting and reporting pathology results. This page contains information and user guides in the downloads section to support these services across Hampshire.

Contacts

For pathology support telephone: 023 8120 6821/4355/6705

For Solent ICE requesting, reporting issues and new user requests email: UHS.GPLinks@nhs.net

Our office hours are Monday to Friday, 9am to 5pm, excluding bank holidays and public holidays.

Solent contacts:

Southampton office: 023 8071 6761

Label ordering:

Labels are ordered from Collector Set Printers ref item SNHS719 ICE LABEL SHEETS (pack 100)

Southampton Solent office have account to order these: contact RSH admin manager office : 023 8071 6761

Configuration and user activation

Before contacting pathology your Inform user account needs to be setup by Solent system administration and your account set to the appropriate site codes

Once users are allocated their user login ID then this can be communicated to UHS pathology to request to add to UHS ICE.

Users must then be trained (this manual) on how to use the ICE application appropriately for Solent and UHS service requirements

To request a Pathology test

1. Log into Inform website: <https://live-sh.solent.nhs.uk/informshweb/live/application.htm>

2. Logon to Inform : Enter your
'User name' and 'Password'

3. Confirm your current location

inform Sexual Health

User name: labtest

Password:

Logon Close

Version 1.30.70 (Rev. 4677)

inform Sexual Health

User name: Lab Test

Current Location: Southampton Pathology Lab

Confirm Cancel

Version 1.30.70 (Rev. 4677)

4. Select 'Patient Search'

5. Enter Patient's ID number

6. Press 'Search'

Within the ICE system the Pathology tests and investigations are presented within a column of tabs on the LH side. Within each tab are requests for the pathology discipline(s). The first page displayed is labelled 'PHE Southampton', however a user may prefer to select another page and make this the default opening page. To do this display the required page on screen and then select the grey button 'Set as Default Panel'.

Hovering the **mouse over a test name** will show any help text (back text, yellow background)

Combined Chlamydia NAATS and Gonorrhoea test on Urine or Swab. Please use sample specific Aptima collection Kit

Molecular Chlamydia/ N.gonorrhoeae	Serology
<input type="checkbox"/> Combined Chlamydia / GC	<input type="checkbox"/> HIV Antigen/ Antibody
<input type="checkbox"/> Combined Chlamydia / GC (2)	<input type="checkbox"/> Syphilis antibody
<input type="checkbox"/> Combined Chlamydia / GC (3)	<input type="checkbox"/> RPR/VDRL

Some further information is presented in the form of **external links (URLs)**

These can either be attached to a test , or presented as dedicated information links which are ‘non-requestable pseudo tests’. In either case click on the open book icon and the link will open in a new window

The following items are not tests, click the open book item to access Laboratory Service Information which opens in a new browser window and this is independent to the ICE system

Microbiology (PHE)

Microbiology laboratory services at UHS are managed by Public Health England (PHE) and, as such is also part of the PHE Regional Microbiology Laboratory Network. The laboratory provides a full microbiological service for the diagnosis of infection, which includes bacteriology, virology, serology, parasitology, mycology, molecular epidemiological studies and environmental microbiology to UHS, other NHS Trusts, general practitioners and local authorities

Check the box against a selected test to make a request, or for collections of tests click the named colour bar
Having selected the required test(s) left click the mouse on the green 'Continue with request' button.

If you cannot find test(s) then use the 'Search' function.

Using the search function

Click on the 'Search' button and the search page is displayed.

Enter part of the test name into the 'Test name' field and select 'Search'. All potential matches will be displayed.

A screenshot of a search interface. On the left, there is a search panel with the following elements: a "Search:" label, a "for" section with radio buttons for "Tests" (selected) and "Test Collections", a "Name:" text input field containing "HIV", and a "Search in:" section with radio buttons for "this panel only" and "all tests/collections" (selected). On the right, a list of search results is displayed, each with a checkbox: "Antenatal - HIV declined", "HIV Antigen/Antibody", "Antenatal Screen HIV and HepB declined", "HIV Viral load", and "HIV Genotyping" (which has a checked checkbox).

Having selected the required test(s) left click the mouse on the green 'Continue with request' button.

Completing the request

After selecting the 'Continue with the request button' the following screen will appear

Patient Name:	Sexual Health F12369080	Hospital Number:	ICE272441	Sex:	Female
Date of Birth:	01 January 1985	NHS Number:	No NHS Number		
Address:	Sexual Health, F102354, SO14 0YG			Telephone No:	

▼ Services

Please complete the following details regarding your request. Once you have completed the details, click the 'Accept Request' button to continue or 'More Tests' to add more tests.

General Details:

User: **lambt**

Bleep / Contact No:

Requesting Consultant / GP: **Select...**

Location:

Global Clinical Details:

Category: **GP patient** ▼

Order Details:

↑ **Virology**

Tests in this order: HIV Antigen/Antibody, Syphilis antibody

I wish to collect the sample(s) later

Priority: **Routine** ▼

Sample collection options:

Collect now

Unspecified date and time

↑ **Virology**

Tests in this order: Combined Chlamydia / GC

I wish to collect the sample(s) later

Priority: **Routine** ▼

Sample collection options:

Collect now

Unspecified date and time

Select the Requesting consultant/GP from the drop down menu, if only one consultant is available this will be shown

Enter the clinical details in to the free text 'Global Clinical Details' box. **– note this is Mandatory**
Change the patient category to Out-Patient

Requesting Consultant / GP: **PATEL, Dr R.J.** ▼

Location: **SSH RSH**

Global Clinical Details:

Category: **Out-Patient** ▼

Sample collection options

There are a variety of options available for sample collection.

There may be more than one 'Order Details' option to complete.

Sample later

If your clinic wishes to defer sample collection (Postpone) and delay the printing of the request form then select the option 'I wish to collect the sample(s) later' and select 'Accept Request'. This action will place the request on a pending queue and a form will not be printed. ICE patient can be accessed at a later date, and the Patient Sample Queue selected from the ICE services menu. This option is useful when the practice uses a Practice based Phlebotomy service or should the patient return to clinic the next day with the sample. At this point the request is then committed and form printed

↑ **Immunology**
Tests in this order: Immunoglobulins
 I wish to collect the sample(s) later

Collect now

This option will default today's date and current time into the request ready for when the request form is to be printed now and the sample(s) are to be collected now, remember to write the sampling date and time on the sample tube.

↑ **Medical Microbiology**
Tests in this order: Urine MC&S
 I wish to collect the sample(s) later
Priority: **Urgent/Stat**
Sample collection options:
 Collect now
 Unspecified date and time

Collect later / Unspecified date and time

This option will NOT set any date and time to the request. The request form is to be printed now and the sample(s) are to be collected later by a Practice or other Phlebotomy service, say when the patient presents with the form. When these samples are collected the date and time of collection needs to be manually entered on the form and sample tube

↑ **Laboratory Medicine**
Tests in this order: FULL BLOOD COUNT
 I wish to collect the sample(s) later
Priority: **Routine**
Sample collection options:
 Collect now
 Unspecified date and time

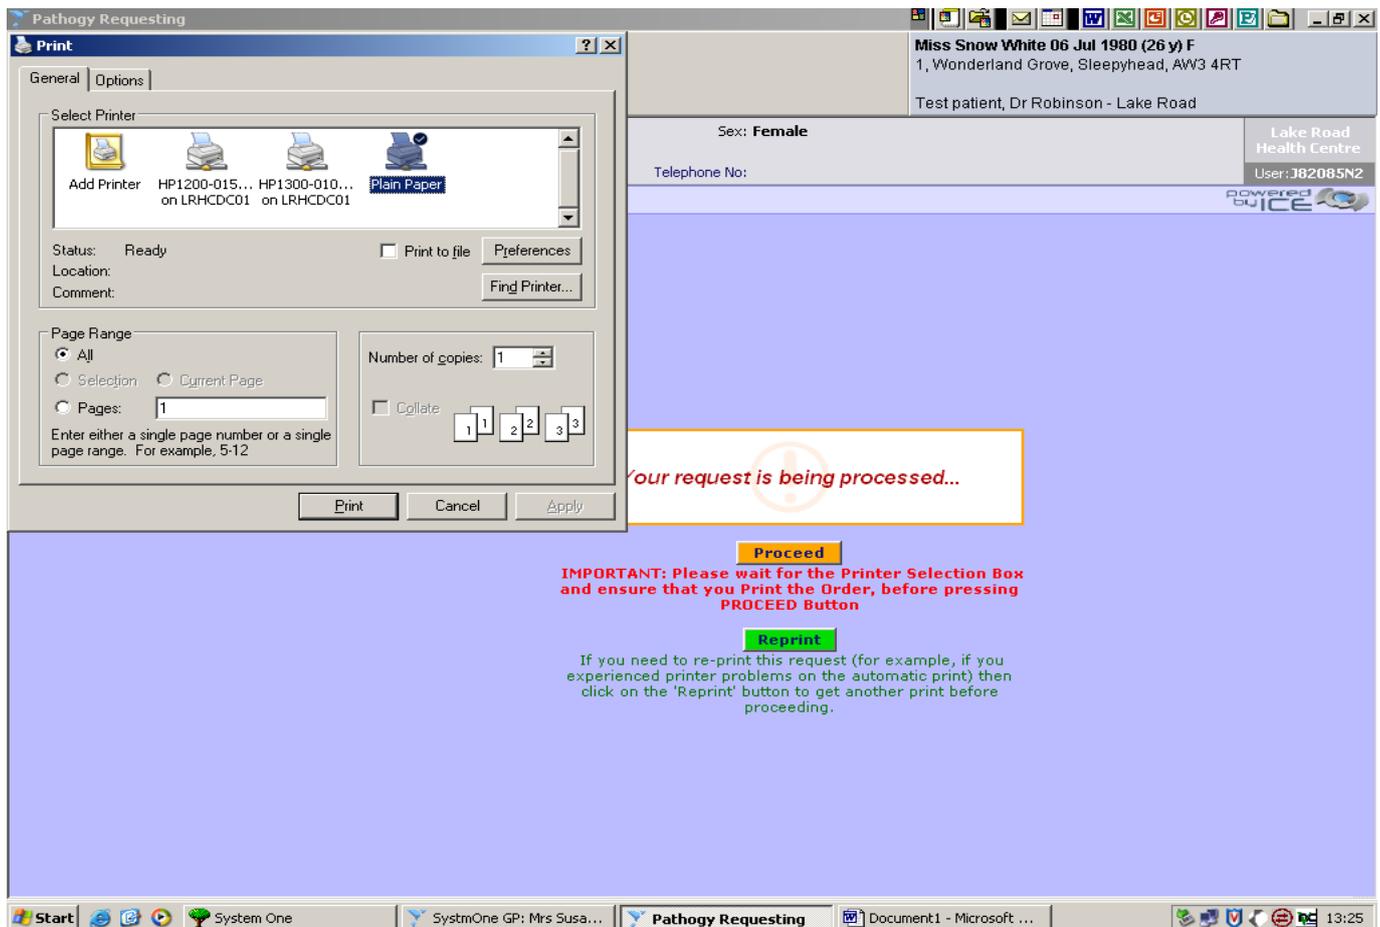

To complete the request select the 'Accept Request' button.

Printing the request form

Once the 'Accept Request' button is selected the system will initiate the printing of the hard copy form. It is important to wait for the printer box to appear before proceeding.

A printer box will appear with the default set to the printer in the room or the printer set-up as a default for the PC.

Select the 'Print' button.

Once the form has printed select the orange 'Proceed' button . This records the request against the patient record in Inform.

If multiple forms require printing the print dialogue will re-appear on screen. Repeat the above process ensuring the orange 'Proceed' button is selected after each print action.

When form printing has completed the following screen will display and samples taken will be shown in Inform NB if the Sample Later option has been selected for some form(s) then the option to print these forms will not be presented as they will be re-accessed and printed at a later date

inform system message to indicate requesting session has completed
The ICE screen/session can then be closed

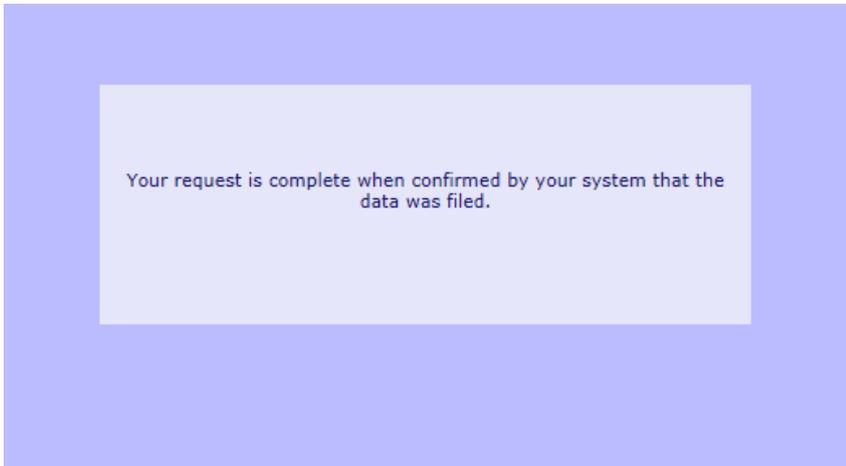

Image of Inform system with some

newly placed requests, these are the ones awaiting results:

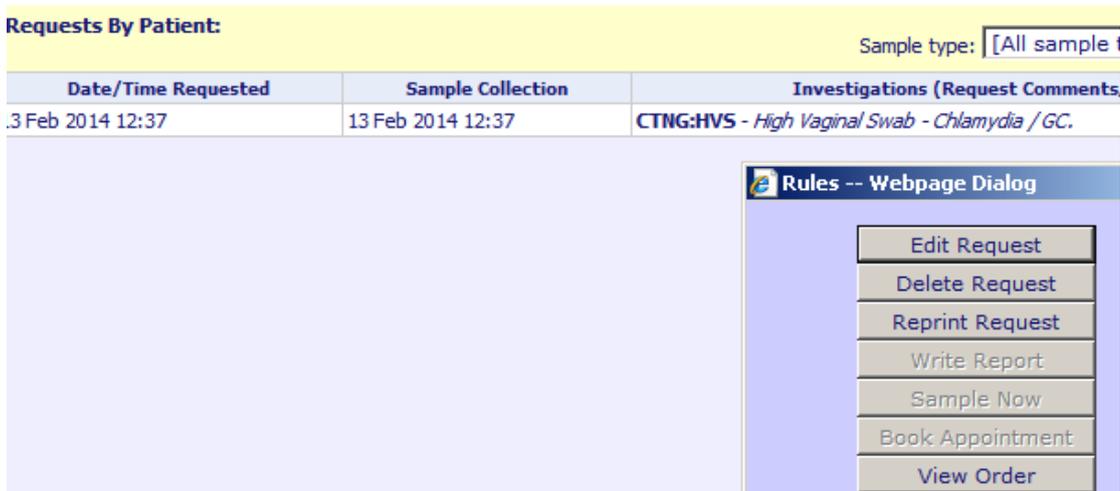

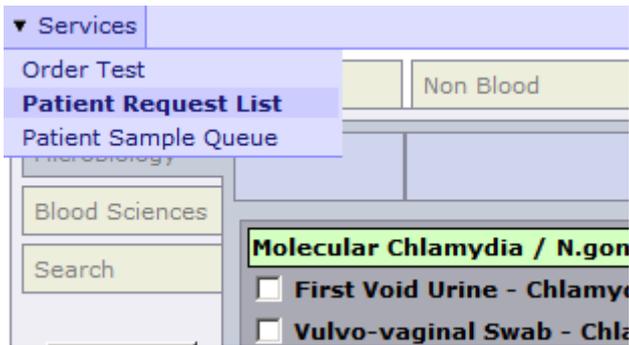

The screenshot shows the Inform system interface for a patient. The patient's details are: Born: 01-Jan-1985 (31y), Gender: Female, Patient ID: F12369080. The interface includes a navigation menu on the left with categories like Demographics & Details, Patient Summary, Clinical Summary (highlighted), Appointments & Care..., Items of Service & Epis..., Medical & Family History, Medication, Allergies & ADRs, Sexual History, Sexual History & LSI, Sexual Orientation, Obstetrics & Gynaecology, Lifestyle & Measurements, Contraception, Tasks, Clinical Notes, Symptoms, Clinical Examinations, Recent Sexual Contacts, Tests & Investigations, Clinical Diagnoses, Education, Advice & Info, and Treatment & Supplies. The main content area shows sections for Worklists & Follow Ups (0), Inbound RSC (0), Outbound RSC (0), Recent Tests & Results (15), Prescriptions / Issues & Supplies (0), Clinical Notes (1), and Care Contacts (2). The Recent Tests & Results section contains a table with the following data:

Date	Test	Result	Notification	Treatment
14-Jan-2016	GUM CT/GC PCR	Awaiting Results		
14-Jan-2016	Anti HIV 1/2 + p24 antigen	Awaiting Results		
14-Jan-2016	Syphilis total antibody	Awaiting Results		
08-Jan-2016	GU Chlamydia NAATS Test	Normal		
08-Jan-2016	GU Genital swab for GC culture	Awaiting Results		
08-Jan-2016	Culture	Awaiting Review		
08-Jan-2016	Hepatitis B core antibody	Awaiting Review		
08-Jan-2016	Anti HIV 1/2 + p24 antigen	Normal		
08-Jan-2016	Syphilis total antibody	Awaiting Further Review		
08-Jan-2016	GUM CT/GC PCR	Awaiting Further Review		

The Clinical Notes section shows a note from 25-Mar-2014 08:32: 'Clinical Note for screen'. The Care Contacts section shows 2 contacts.

Editing, Deleting or Reprinting a Pathology Request

If you need to make any changes, or reprint the request form, click on **Services, Patient Request List**. Click on the investigation eg HVS and the Rules box will show. You can then either Edit Request, Delete Request or Reprint Request.

Editing allows users to add to existing requests or remove test(s) which are no longer required. The request is then re-printed and the old form destroyed

Note reprinting is for where there is printer failure or the form has been lost or damaged – Users must not use re-print or photocopy forms to create ‘another request’ as each form has unique order sample numbers which are barcoded and hence cannot be duplicated. Once a request is resulted reprinting option is not available

Taking a sample later

This section describes further how to process requests for samples which were earlier selected to be retained within the system, this was the square box option:

↑ Immunology

Tests in this order: Immunoglobulins

I wish to collect the sample(s) later

To find any samples awaiting collection for the patient then connect to ICE and use **the Services menu, Patient Sample Queue**. This will then show the POStponed status requests within ICE, if none are shown then all current patient requests have been committed

Patient Name:	Sexual Health F12369080	Ho:
Date of Birth:	01 January 1985	NH
Address:	Sexual Health, F102354, S014 OYG	
▼ Services		
Order Test		
Patient Report List

Its now a matter of clicking each postponed request in turn and picking the remaining option which if patient was present to collect sample now would be Collect Now

Services

General Details

Username:	lambt
Bleep / Contact No:	
Requesting Consultant / GP:	Dr R.J. PATEL (ICE3450)
Location:	SSH RSH
Clinical Details:	test
Priority:	Routine
Telephone Results:	No
ICEMail Results:	No
Category:	Out-Patient
Sample Containers Required:	1 x Plain

Additional Information

↑ **Virology**
Tests in this order: RPR/VDRL

Sample collection options:

Collect now

Unspecified date and time

Accept Request

ICE then prompts to print and stores the request in Inform

The process needs to be repeated for any other POSTponed requests which should be taken .ie. use **the Services menu, Patient Sample Queue** and repeat the above steps

Patient Report List

Inform system imports results directly from ICE into Inform where they can be reviewed.

If results are not in inform the ICE report view may be a useful reference tool, though users may find multiple result records are not collated as efficiently as on Inform

Employing A4 ICE label sheets

This is guidance for practices using ICE A4 integral label sheets on how to identify and affix the label(s). The label sheets would be placed in the plain A4 tray of your local printer prior to printing ICE forms. Some Laboratory Medicine forms will generate multiple labels, one per sample

<div style="border: 2px solid red; padding: 5px;"> Plain 12534330 F16000445 Sexual Health 01 Jan 1980 CAB, HHIV </div>		← Label

Date Taken: 12 Jan 2016	Time Taken: 16:44	Taken By: Keith Burrill	
Southampton NHS University Hospitals NHS Trust		Virology	
ORDER No: ▶▶▶▶▶▶		 12534330	
LAB No: ▶▶▶▶▶▶		Postcode: SO14 0YG Telephone:	
Investigations Requested: Hepatitis B screening (GUM) HIV Antigen/Antibody		Tube/Container: Plain	
		Specimen Type: screen	
		Clinical Details: screen	
		Requesting M.O. Name: Dr Reena MANI	Bleep/Tel No:

Note 1. for each barcoded line indicating test(s) and Tube/Container type there is a corresponding label. Please ensure the correct label is selected and affixed to the correct Tube/Container type.

The label includes the container type ID plus the code(s) of test(s) requested.

Note 2. the date/time of sample must also be written on the specimen container

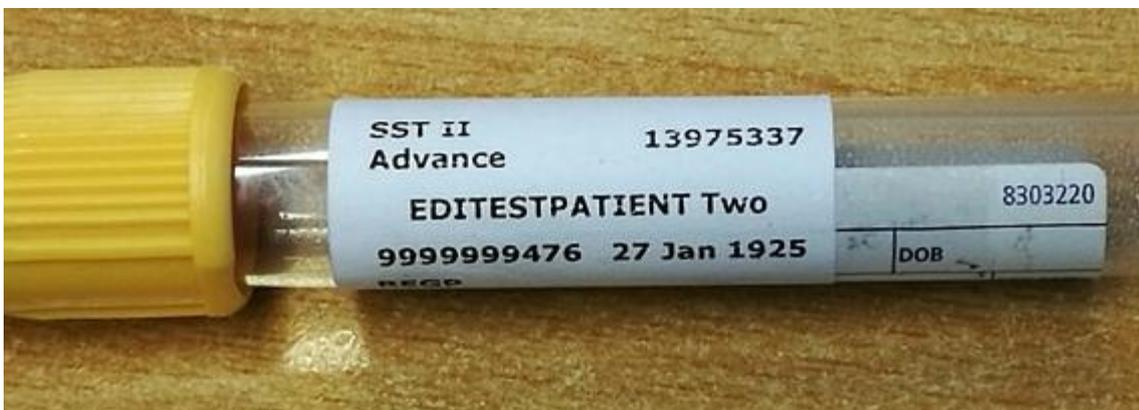

1. Deploying A4 label forms

Place these face down with label backing sheet (yellow toned) sheet uppermost nearest the front of the printer tray

2. Labelling the tube

First ensure you pick the correct label for the correct tube type & tests(s), e.g.SST II:

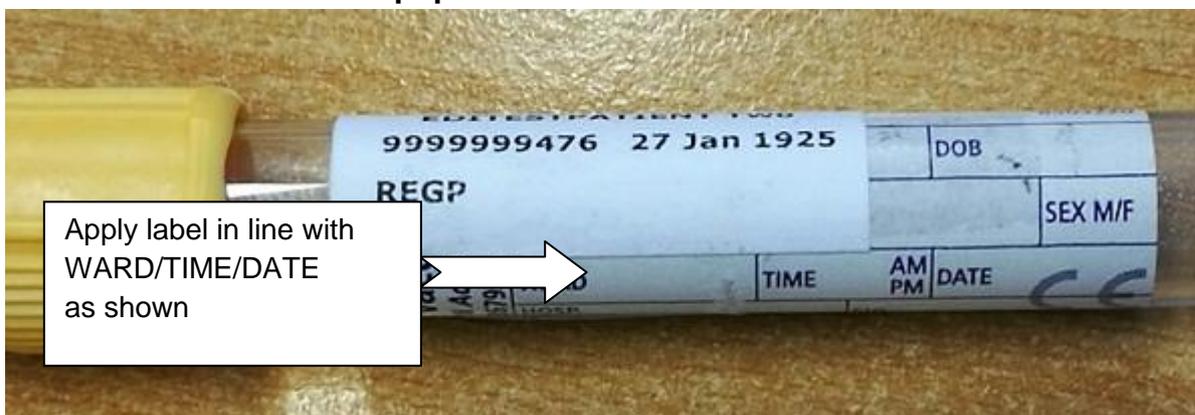

3. Positioning the label

The label needs to be aligned neatly adjacent to the top of the manufacturers label (NO HIGHER) as this ensures Lab analytical instruments can read the barcode when this is applied by the lab, see picture in 2. above.

The label bottom edge should also be aligned to the top of the WARD/TIME/DATE

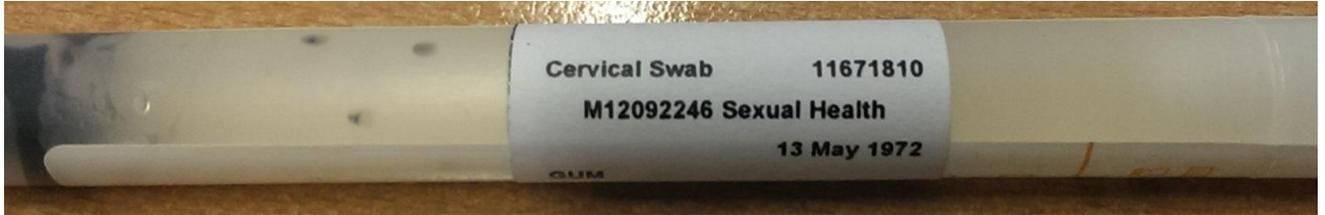

NB then write the Date of sample and Time of sample on the tube – bottom of label or in preprinted tube label boxes

When the sample is taken write the date and time on the sample and on the ICE form – should this be not populated.

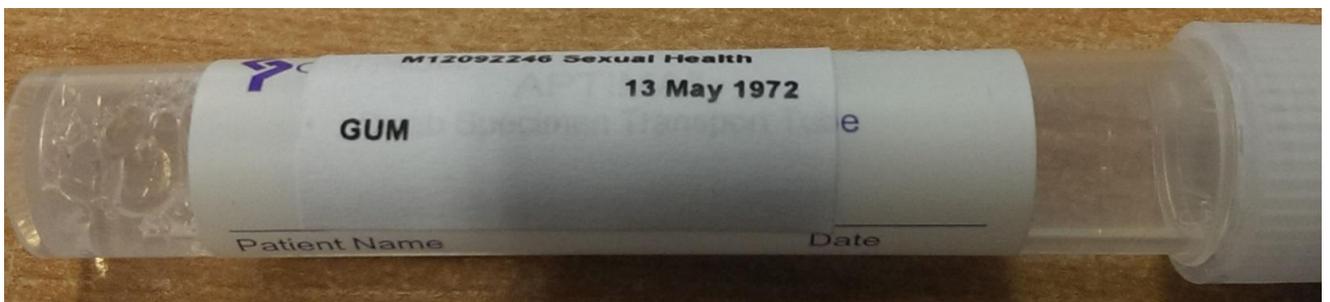

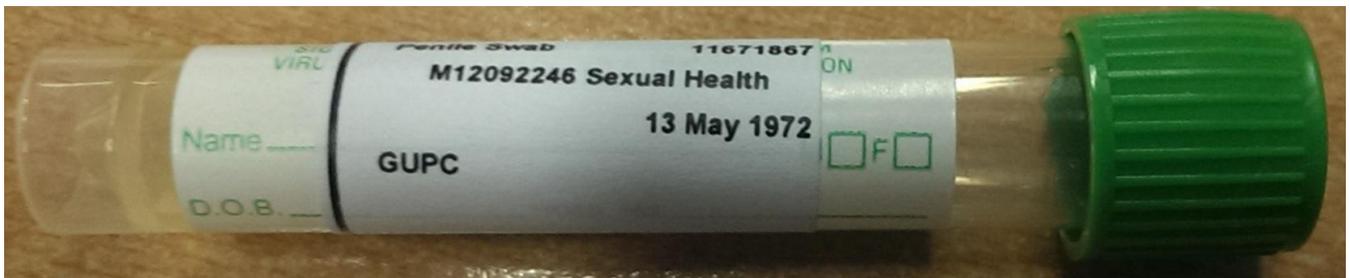

Further container examples

GC culture swab:

When the sample is taken write the date and time on the sample and on the ICE form if this is not populated.

----- End of User Guide -----
