

## Patient information factsheet

### Bed exercises

It's important to do regular exercises while in bed to maintain the strength in your arm and leg muscles. Your physiotherapist will advise you on which of these exercises you need to do and how regularly.

- 1) Lying on your back, point and flex your toes.

Repeat \_\_\_\_\_ times.

- 2) Lying on your back, squeeze your buttocks firmly together.

Hold for ten seconds. Repeat \_\_\_\_\_ times.

- 3) Lying on your back, pull your toes towards you and brace your knees down firmly against the bed. Hold for ten seconds.

Repeat \_\_\_\_\_ times.

- 4) Bend and straighten your leg, sliding your heel towards your bottom.

Repeat \_\_\_\_\_ times.

- 5) Lying on your back, place a rolled up blanket underneath your knee. Push your knee down into the blanket and lift your heel off the bed.

Hold for ten seconds. Repeat \_\_\_\_\_ times.

- 6) Lie on your back and pull your toes towards you. Tighten the muscles on the front of your thigh to straighten your knee and then lift the leg off the bed by approximately 20cm.

Repeat \_\_\_\_\_ times.
